

ETHOS Write Up

Looking back...you did a lot of projects over the last school year and you had to deal with a lot of different personalities. You were given deadlines and had to manage your own time to get projects done:

- 1) Do you think you put in your best work on your projects? Or did you just wait till the end and try to turn in something for points?
- 2) Did you try to perfect your projects, or was quality not as important compared to just getting it turned in.
- 3) Did you struggle with time management this year? Is this an area you could improve upon for next year?
- 4) What was your favorite project this year (1st and 2nd semester)? Why was it your favorite? If you could change the project what would you do?
- 5) What was your favorite part about this year (academically)? What was your favorite field trip?
- 6) What is something you would suggest I change for the next sophomore class so they have a better experience?
- 7) Anything Else?

Aspire3 Write Up

Aspire3 is really what ETHOS is based up...the formation of an idea turned into something tangible, a start up company. Learning about business terminology, ideas, and practices is only the beginning. The next step is to actually start something! With that, answer the following questions:

- 1) Was it hard to come up with a problem and then a solution?
- 2) What was your idea and who came up with it?
- 3) After seeing the competition do you think you still had a good idea?
- 4) If you could do it over would you pick a different problem to solve? Or would you just modify your original idea to make it better?
- 5) If you had to give advice to next year's sophomore class...what would you say to them before they started this project (advice)?
